

## Program Rules and Details

### U.S. Dealers Only

#### Items that CAN be financed:

- Central Boiler furnaces, parts, labor, shipping, and delivery costs, if applicable can be financed through Central Financing. An itemized list must be included on the invoice to the customer for all items being financed and sent to Central Boiler with the completed Warranty/Registration. Installation can only be financed if a Central Boiler furnace is also being financed.
- Stryker log splitters can be financed through Central Financing.
- Central Boiler furnaces under the courtesy trade program can be financed through Central Financing.
- Central Boiler furnaces used in residential applications. *(The financing for Central Boiler furnaces used in commercial applications is available through Accord Financial, at 800-347-4977.)*

#### Items that CANNOT be financed:

- Used furnaces, other brands of furnaces.
- Central Boiler has cost-associated loan-funded amounts. No loan shall exceed 100% of the cost to the customer of the equipment, home improvements and/or systems, and any related pre-paid warranty or service agreement, being provided by contractor, together with related costs of installation.

#### Other details:

- **When using the promotional financing options (6 Mo SAC, or Traditional Installment Loan) through Central Financing, the price of the installation cannot exceed the price of the Central Boiler furnace.** If the price of installation and labor exceed the furnace price, non-promotional financing (Traditional Installment Loan) options should be used.
- If using Central Financing for the installation costs, Central Boiler expects the dealer to use Central Boiler parts for the major cost items (i.e., ThermoPEX, radiant floor loops, heat exchangers, etc.).
- Central Boiler reserves the right to amend or discontinue this program at their discretion.
